

Arvenna Health Group

Management Presentation

February 2026

Prepared by the management of Arvenna Health Group with Quenlow Advisory (advisor)

Country A's only integrated private hospital group

Agenda

1	**Overview of the Company**	**Page 3**
2	Strategy Roadmap	Page 22
	Appendix - definitions, KPI reconciliation and basis of preparation	Page 26

This presentation has been prepared by the management of Arvenna Health Group with the assistance of Quenlow Advisory for discussion with prospective investors. Financial information for 2021A-2024A is taken from audited group accounts, 2025A figures are preliminary and unaudited management accounts, and 2026B is the budget approved by the board in January 2026. Local-currency amounts (LCA) are converted to US dollars at 0.235 USD/LCA throughout. Operational KPIs are drawn from the group hospital management information system.

Source: Company information

Built through buy-and-build between 2019 and 2023 into the only integrated hospital group in Country A

Four hospitals and a diagnostics platform assembled in four years around a flagship founded in 2011, with the founder still leading the group

Group history

2019	2020	July 2021	2022	2023
Group formed by Dr. Karim Sfaxi-Mellouli around AHG Central (founded by him in 2011 with 140 beds), by then the 168-bed flagship hospital in the capital; group holding company incorporated	AHG Central acquires 80% of AHG Coast and 90% of AHG North (1); the country's only private radiotherapy unit is commissioned at AHG North; shared services and group procurement start	Kessport Frontier Fund II and DFI partners invest through a primary capital increase; single HMIS rolled out group-wide; build-out of AHG Diagnostics begins	Acquisition of AHG Park (site held on a 25-year lease to 2039), funded by Fund II's June 2022 follow-on; AHG Diagnostics carved out as a standalone laboratory and imaging entity	Second-phase oncology expansion at AHG North funded by the June 2023 follow-on; 32 beds added across the four hospitals

Mission	Vision	Core values
We deliver safe, high-quality care to every patient through well-trained staff, evidence-based protocols and modern medical technology, at a cost that keeps specialised medicine accessible to the families and employers of Country A.	To be the leading integrated private healthcare provider in Country A and the reference platform for patients travelling from the wider region, combining Centres of Excellence with the convenience of a general hospital network.	Patient first in every decision; our network is the first point of care for the communities we serve; respect for our doctors and staff; transparency with payors and partners; stewardship of the resources entrusted to us.

Group development 2021A to 2025A

510 to 542	$32.8M to $54.9M	$8.2M to $13.0M	3.40x to 1.85x	$14.0M
Inpatient beds	Revenue (USD equivalent)	EBITDA	Net debt / EBITDA	Capex invested 2021A-2025A

Today the group operates 4 hospitals with 542 inpatient beds (620 bed-equivalents including 46 ICU beds and 32 day-case bays), a diagnostics entity and roughly 1,900 employees. 2025A group revenue reached LCA 233.8M ($54.9M (2)), a 13.8% compound annual growth rate since 2021, with EBITDA of $13.0M.

(1) Ownership at acquisition; minority co-shareholders remain at facility level. (2) At the reference rate of 0.235 USD/LCA. Source: Company information

AHG at a glance

542 inpatient beds, 37,924 admissions and 117,000 outpatient visits in 2025A; 42% of patients travel from abroad

Group overview

- Headquartered in the capital of Country A, AHG is the largest and only integrated private hospital network in the country, formed in 2019 by the founder of AHG Central; Kessport Frontier Fund II and our DFI partners have been shareholders since July 2021.
- International patients account for 42% of patient volumes and 59% of revenues, making AHG the regional leader in medical value tourism, with 6 regional source markets served through 14 partner clinics.
- We operate 4 hospitals structured around seven Centres of Excellence (cardiac surgery and cardiology, oncology and radiotherapy, neurosurgery, orthopaedics and trauma, IVF and maternity, emergency and endoscopy, physiotherapy and rehabilitation) plus AHG Diagnostics, our laboratory and imaging entity.

Group facilities and Centres of Excellence

AHG Central	AHG Coast	AHG North	AHG Park
176 beds - cardiac surgery and cardiology, neurosurgery, IVF and maternity	120 beds - orthopaedics and trauma, emergency and endoscopy	142 beds - oncology and radiotherapy, cardiac cath lab	104 beds - maternity and IVF, physiotherapy and rehabilitation

2025A key financials (1)

LCA 233.8M Revenues (local currency)	**$54.9M** Revenues (USD equivalent)	**$13.0M (23.6%)** EBITDA (margin)	**$9.4M (17.0%)** EBIT (margin)	**$24.0M (1.85x)** Net debt (2) (x EBITDA)

2025A operational KPIs

4 + 1 Hospitals + diagnostics entity	**$55.9M** Net tangible assets (owned real estate & equipment)	**542** Inpatient beds	**46** ICU beds	**38** Operating rooms
5 MRI scanners	**6** CT scanners	**2** Catheterisation labs	**3 of 4** Owned hospital sites	**588,679** Diagnostic tests (lab, imaging, cardiac)
37,924 Inpatient admissions	**42%** International patients	**117,000** Outpatient visits (excl. ER)	**71,602** Emergency visits	**70.3%** Bed-weighted occupancy
310 Physicians (salaried and partner)	**640** Nurses and technicians (3)	**1,900** Employees	**46** Payer relationships	**1.2M** Unique medical records

Institutional shareholders since July 2021 (1)

Kessport Frontier Fund II (58%)	**Kessport Frontier Fund III (12%)**	**DFI Partner 1 (15%)**	**DFI Partner 2 (15%)**

(1) Management accounts, 2025 preliminary, unaudited; USD at 0.235 USD/LCA; shareholdings per the transaction model. (2) Gross debt less cash, incl. overdrafts. (3) Employed nurses and technicians, excl. physicians. Source: Company information

An experienced and committed management team with long tenure across the group

Founder and group leadership

Dr. Karim Sfaxi-Mellouli
Founder & Chairman (2011)
Over 30 years in hospital medicine and management; founded AHG Central in 2011 and formed the group around it in 2019; qualified physician with a hospital-management degree from an overseas university.

Leila Bouhlel-Aziz
Group Chief Executive Officer (2019)
Former country manager of an international healthcare services company; led the acquisitions and integration of AHG Coast, North and Park; engineering degree and MBA.

Omar Trabelsi-Farah
Group Chief Financial Officer (2021)
Joined ahead of Fund II's investment; previously audit senior manager and CFO of a listed services company in Country A; chartered accountant; leads finance, treasury and investor reporting.

Key executives (2)

Group Chief Operating Officer
Joined 2021
18 years in hospital operations; leads integration and capacity; master in health management.

Group Management Controller
Joined 2021
Built the group reporting and budget cycle; 12 years in controlling; business-school graduate.

General Secretary
Joined 2020
Legal, regulatory and governance; 15 years in corporate law; bar admission in Country A.

General Manager, AHG North
Joined 2020
Led the integration of the North site and its oncology centre after acquisition; 14 years in facility management; pharmacist.

General Manager, AHG Coast
Joined 2020
Ten years managing the Coast hospital before and after its acquisition; nurse and MBA.

Dr. Hela Chaabane
Chief Medical Officer (2021)
Chairs the medical council and quality committee; 20 years in internal medicine and public health.

Medical leadership (2)

International Medical Advisor
Joined 2021
Academic oncologist at an overseas university hospital; advises on protocols, tumour boards and research.

Medical Director, AHG Central
Joined 2016
Cardiac surgeon; 22 years of practice; leads the cardiac surgery Centre of Excellence and the university teaching agreement.

Medical Director, AHG North
Joined 2020
Radiation oncologist; 16 years in public and private oncology; heads the radiotherapy unit.

Medical Director, AHG Coast
Joined 2018
Orthopaedic and trauma surgeon; 19 years of practice; built the orthopaedics and emergency Centre of Excellence.

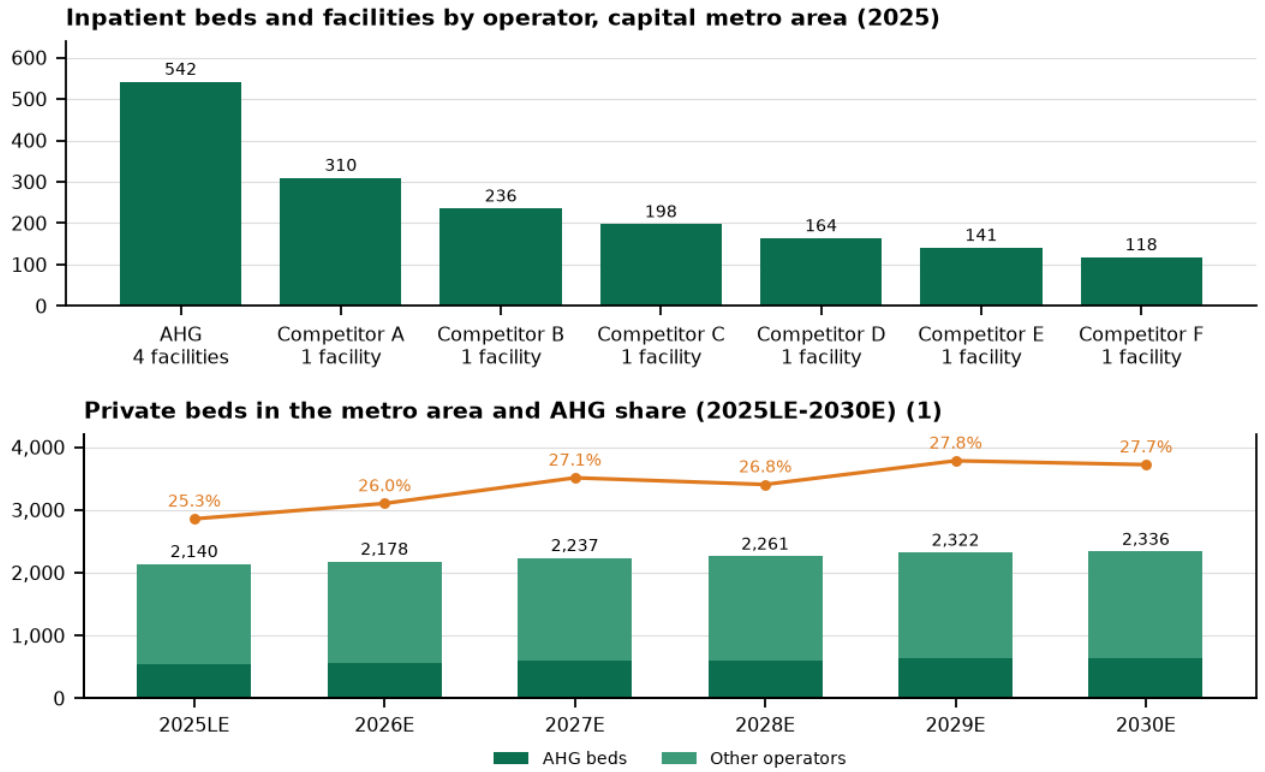

Medical Director, AHG Park
Joined 2022
Obstetrician-gynaecologist and IVF specialist; 17 years of practice incl. fellowships abroad; leads maternity and IVF.

(1) Year in brackets = joining date; photographs redacted. (2) Executives and medical directors below board level are identified by role only in this version. Source: Company information

AHG is by far the largest, and the only integrated, private hospital group in Country A

25.3% of private beds in the capital metro area and 11.1% nationally; share expected to reach 27.7% in the metro area by 2030

Largest institutional hospital group in the metro area by number of beds and facilities

Significant barriers to entry

- Brand equity and track record
  - 15 years of outcomes data at AHG Central (founded 2011), a 91% patient recommendation rate and a group brand recognised by patients, referring doctors and payers across the region.
- Economies of scale
  - Group procurement saves an estimated 6-8% on consumables and pharmacy; shared back office, a single HMIS and one radiotherapy unit serving all sites - which no single-site operator can replicate.
- Strategic geographic coverage
  - Three of four hospitals within 15 minutes of the international airport; the fourth serves the business district and the fast-growing southern residential belt; six collection points for AHG Diagnostics.
- Healthcare partner of choice
  - Direct contracts with 46 payers (28 corporate accounts and 18 insurers); first-call provider for evacuation and assistance companies.

Competitor facilities

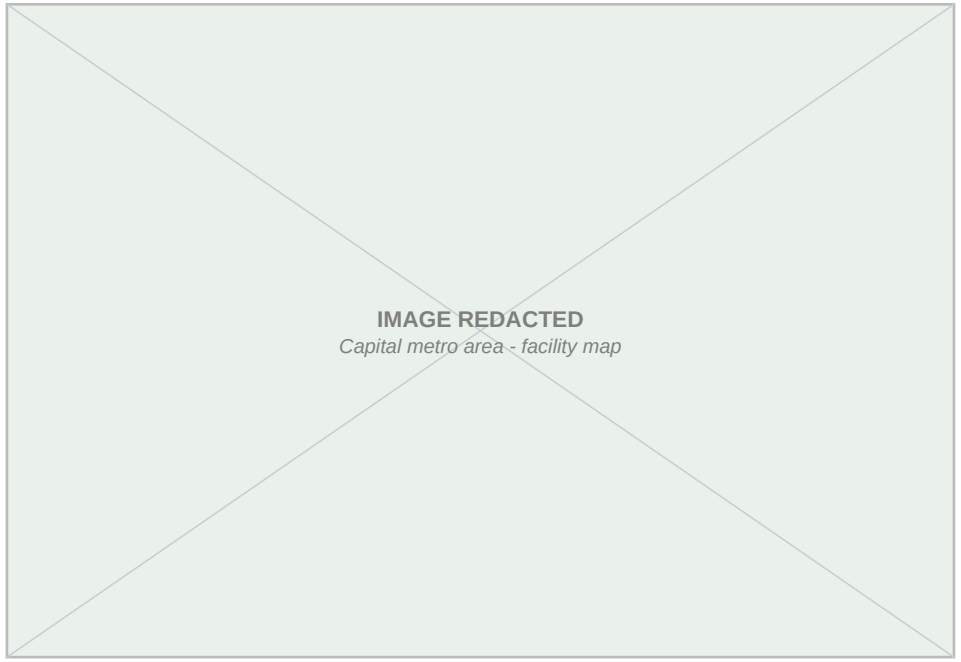

AHG operates 4 hospitals and a diagnostics entity with six collection points; the six largest local competitors are single-site operators of 118-310 beds, none with an integrated referral network or a radiotherapy unit.

(1) AHG bed plan includes the 24-bed Park ward (H1 2026) and the optional Park and Coast extensions (2027-2029), none of which are in the budgeted bed count; competitor data from company market mapping. Source: Company information

Extensive network coverage in prime locations across the capital metro area

Three of our four hospitals are within 15 minutes of the international airport, the entry point for international patients; three of the four sites are owned

Facility map

Central, Coast, North: owned sites; Park: leased to 2039; Diagnostics: 6 collection points

AHG Central sits in the central district next to the diplomatic quarter and the hotel stock used by international patients and their families; AHG Coast (coastal district, 12 minutes from the airport) and AHG North (northern suburb) are within 15 minutes of the airport. AHG Park anchors the business district and the southern residential belt, where population growth is fastest and where the group holds an option on adjacent land for an extension.

Facility cards - 2025A

Facility	Built-up area	Beds	Occupancy	Inpatients	Outpatients	ER visits	Revenue
AHG Central	21,400 sqm	176	75.7%	13,328	37,600	22,982	LCA 74.4M
AHG Coast	13,800 sqm	120	66.0%	8,140	25,800	15,234	LCA 48.5M
AHG North	17,900 sqm	142	72.2%	9,467	31,000	18,984	LCA 66.2M
AHG Park	11,600 sqm	104	63.5%	6,989	22,600	14,402	LCA 41.1M
AHG Diagnostics	2,100 sqm	-	-	-	-	-	LCA 8.0M
Group	**66,800 sqm**	**542**	**70.3%**	**37,924**	**117,000**	**71,602**	**LCA 233.8M**

- AHG Central is the flagship and the largest site (176 beds, 75.7% occupancy); AHG North combines a general hospital with the only private radiotherapy unit in the country.
- Inpatient admissions are derived from 137,155 occupied bed nights and facility-level average length of stay of 3.4 to 3.9 days.
- Every hospital runs a 24/7 emergency department, an intensive care unit and an on-site laboratory, and refers complex cases to the relevant Centre of Excellence within the network; AHG Park is held on a 25-year lease to 2039, the other three sites are owned.

Occupancy = occupied bed nights / available bed nights (beds x 360). Outpatients exclude emergency visits. Revenue in local currency, before doctors' fees invoiced directly by partner doctors. Source: Company information

Centres of Excellence and specialisation within a general hospital structure (1/2)

Surgery, cath lab and accommodation generate 52% of hospital revenue; outpatient activity is already 42% of hospital revenue, well placed for the shift to ambulatory care

2025A hospital revenue by service line (USD M) (1)

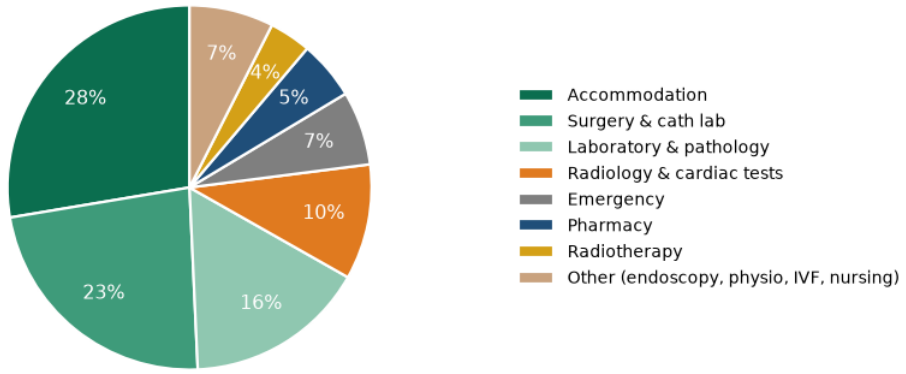

Service line	2025A revenue (USD M)	% of total	Growth vs 2024A
Accommodation	15.5	28.6%	9.1%
Surgery	11.5	21.3%	14.5%
Laboratory	5.7	10.6%	16.3%
Radiology	4.2	7.8%	15.5%
Emergency	3.7	6.8%	16.6%
Pharmacy	2.9	5.4%	11.9%
Radiotherapy	2.1	3.8%	9.4%
Endoscopy	1.6	2.9%	17.9%
Cardiac tests	1.5	2.8%	16.9%
Pathology	1.4	2.5%	14.8%
Cardiac catheterisation	1.4	2.5%	16.6%
Nursing fees	1.1	2.0%	16.0%
Physiotherapy	0.8	1.5%	18.2%
IVF	0.7	1.3%	13.8%
Four hospitals - total	**54.1**	**100.0%**	**13.2%**

Four hospitals, 14 billable service lines; AHG Diagnostics adds $1.9M of laboratory and imaging revenue, largely from third-party clinics.

2025A breakdown by type of patient

37,924	117,000	58%	42%
Inpatient admissions	Outpatient visits	Inpatient share of hospital revenue (3)	Outpatient share of hospital revenue (3)

2025A revenue by department (2)

A comprehensive specialisation offering: every department except radiotherapy is present in at least three hospitals, and the group refers patients internally so that each Centre of Excellence reaches critical mass.

(1) Four hospitals, before the intercompany elimination of $1.0M; USD at 0.235 USD/LCA. (2) Incl. AHG Diagnostics; revenues net of doctors' fees. (3) Inpatient = accommodation, surgery, cath lab and pharmacy. Source: Company information

Centres of Excellence and specialisation within a general hospital structure (2/2)

Positioning by level of care: AHG already delivers tertiary care in five of seven specialties and is building quaternary capability in oncology and cardiology

Level of care	Cardiac surgery & cardiology	Oncology & radiotherapy	Neurosurgery	Orthopaedics & trauma	IVF & maternity	Emergency & endoscopy	Physiotherapy & rehabilitation
Quaternary - highly specialised, experimental or rare procedures	In progress: structural heart programme (transcatheter valve procedures) with visiting proctors	In progress: stereotactic radiotherapy and clinical-trial participation	Awake craniotomy and deep-brain stimulation referred abroad; complex spine programme in progress	Complex revision arthroplasty referred to partner centres	Fetal surgery referred abroad	Not applicable	Not applicable
Tertiary - specialised hospital care by referral	Two cath labs, 961 catheter procedures in 2025A, cardiac surgery at AHG Central, paediatric cardiac outreach programme at AHG North	Radiotherapy unit at AHG North (6,588 sessions in 2025A), chemotherapy day unit, tumour boards	Neurosurgery and spine surgery at AHG Central, stroke unit	Joint replacement, arthroscopy and trauma surgery led from AHG Coast	IVF laboratories at AHG Central and AHG Park; high-risk pregnancy unit at AHG Park	Trauma-receiving emergency department and advanced endoscopy suite at AHG Coast	Neuro-rehabilitation and cardiac rehabilitation programmes at AHG Park
Secondary - general hospital care	Non-invasive cardiology, heart tests, coronary care beds at every hospital	Oncology consultations and follow-up at every hospital	Neurology outpatient clinics and EEG/EMG labs	Fracture clinics and sports medicine	Obstetrics and gynaecology at three hospitals	24/7 emergency department and diagnostic endoscopy at every hospital	Outpatient physiotherapy at every hospital
Primary - first point of care	Health checks and cardiovascular risk screening	Screening programmes (breast, cervical, colorectal)	Headache and epilepsy clinics	Occupational health and ergonomics for corporate clients	Antenatal classes and well-woman clinics	Urgent-care walk-in clinics and telephone triage	Preventive and occupational physiotherapy

Specialisation offering by facility

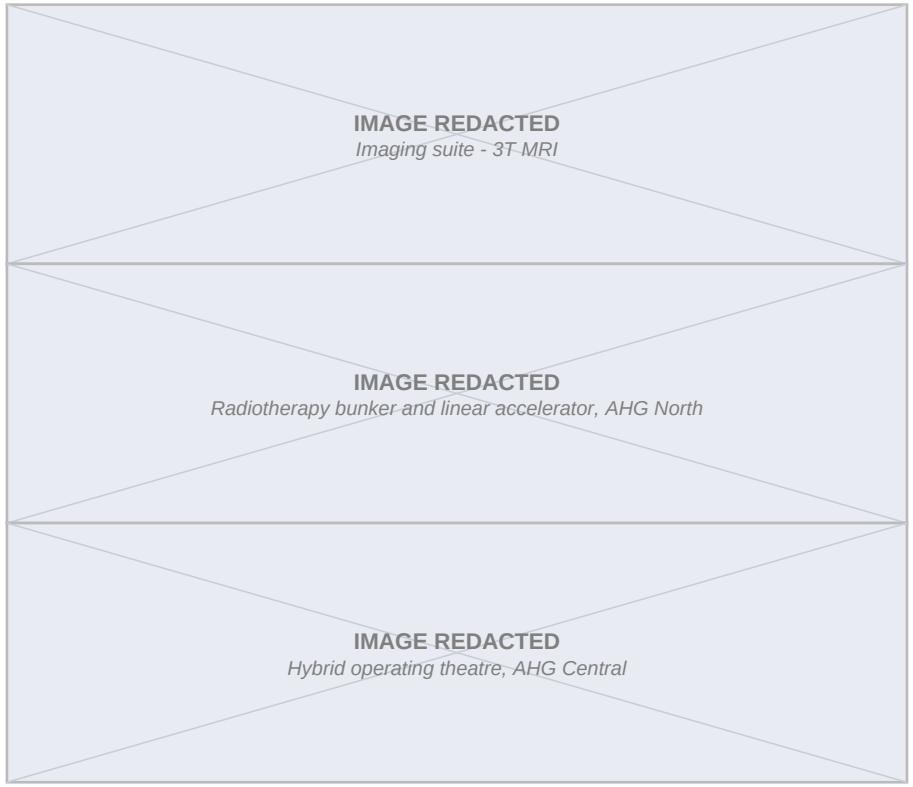

Facility	Cardiac surgery & cardiology	Oncology & radiotherapy	Neurosurgery	Orthopaedics & trauma	IVF & maternity	Emergency & endoscopy	Physiotherapy & rehabilitation
AHG Central	Centre of Excellence (cardiac surgery, two cath labs)	Visiting consultants	Centre of Excellence	Department	Centre of Excellence (IVF)	Department	Service
AHG Coast	Service	Consultations	Consultations	Centre of Excellence	Consultations	Centre of Excellence	Service
AHG North	Department (cath lab)	Centre of Excellence (radiotherapy)	Visiting consultants	Visiting consultants	Consultations	Department	Service
AHG Park	Consultations	Consultations	Consultations	Visiting consultants	Centre of Excellence (maternity, IVF)	Department	Centre of Excellence (rehabilitation)

Shaded row = minimum expected level of care for a specialised hospital. "In progress" items are funded in the capex programme described on the asset-base page; items referred abroad are covered through our international academic partnerships.

Source: Company information

Well-invested asset base: $14.0M of capex in infrastructure and technology since 2021

Advanced equipment underpins complex care, attracts and retains leading doctors; average age of high-value equipment is 4.2 years

Capital expenditure 2021A-2026B (1)

	2021A	2022A	2023A	2024A	2025A	2026B
Capital expenditure (USD M)	**1.9**	**2.7**	**2.8**	**3.5**	**3.1**	**3.9**
% of revenue	5.7%	7.3%	6.5%	7.2%	5.7%	6.2%

Capex programme 2026-2028

Project	Scope	Timing	Status
Second linear accelerator, AHG North	Doubles radiotherapy capacity from 36 to 72 patients per day; unit ran at 75% of capacity in 2025A; oncology day-care expansion	2026-27	In 2026 budget; permit filed
Bed expansion, AHG Park - phase 1	24-bed ward fitted out within the existing building; commissioning in H1 2026	H1 2026	In 2026 budget (2)
Bed expansion, AHG Park - phase 2	40-bed extension on adjacent land held under option; second IVF laboratory; design completed	2027-28	Decision H2 2026 (3)
Ward renovation and bed expansion, AHG Coast	Ward renovation in 2027; 40-bed orthopaedic and surgical wing at feasibility stage	2027-29	Renovation planned; wing optional (3)
Imaging renewal cycle	Replacement of two CT scanners and one MRI; PACS upgrade	2026-27	In 2026 budget
Hybrid theatre and cath lab upgrade	Structural heart programme at AHG Central	2027	Planning

Capex averaged 6.5% of revenue over 2021A-2025A ($14.0M in aggregate), keeping theatres, the imaging fleet and the radiotherapy unit within manufacturer life cycles. The 2026 budget provides $3.9M (6.2% of revenue); the plan carries capex at about 5.5% of revenue by 2030.

(1) Organic capex per management accounts; USD at 0.235 USD/LCA. (2) Not in the 2026B bed count, shown at 2025 licensed capacity. (3) Not in the 2026 budget or in the bed counts shown. Source: Company information; management accounts; 2026 budget

Best in class for quality, valued by patients, doctors, payors and corporates

91% of surveyed patients would recommend AHG; 46 direct payer contracts; consultant churn below 5% per year

Patients are highly satisfied

- Independent patient surveys (4,200 responses in 2025) score above 4.5 out of 5 on all criteria: medical care, nursing, cleanliness, waiting time and billing transparency.
- To the question "would you recommend AHG to family and friends", 91% answered yes in 2025, up from 84% in 2021; the net promoter score rose from 55 to 68 over the same period.
- Complaint resolution within 48 hours in 95% of cases; a group patient-experience office reports monthly to the board.

Blue-chip corporates and insurers partner with AHG

Direct contracts with 46 payers: 28 corporate accounts and 18 insurers, incl. the four largest private insurers in Country A - selected

Insurer 1	**Insurer 2**	**Insurer 3**	**Insurer 4**
Corporate A (energy)	**Corporate B (banking)**	**Corporate C (telecom)**	**Corporate D (mining)**

Doctors are loyal and committed - medical staff and talent

- 310 physicians practise within the group, of whom 160 are exclusive partner doctors; 60% trained abroad and 38 hold university teaching positions; 640 employed nurses and technicians support them.
- Talent retention is a board-level priority: consultant churn is below 5% a year and 72% of consultants have practised with AHG for more than five years; a doctors' council at each hospital and revenue-sharing aligned with quality indicators.
- Retention and recruitment initiatives
  - Modern working environment and equipment renewal cycle
  - Centres of Excellence offering complex case mix and research
  - Sponsorship of conferences and international fellowships
  - Doctors involved in hiring committees and protocol design
  - Doctors as ambassadors in the group's marketing

Certifications and evidenced high quality standard

International hospital accreditation - three hospitals (1)	**International laboratory accreditation - AHG Diagnostics**	**Quality-management certification - group**
Oncology network audit - radiotherapy unit (annual)	**National health ministry licences - all sites**	**Insurer quality label**

(1) Obtained through an independent international accreditation body; renewed in 2024 for three years. Source: Company information

Integration across all operations lets AHG leverage scale, market position and referrals

Seven integration workstreams delivered since 2021; procurement savings and case mix lifted group gross margin from 69.2% in 2022A to 69.7% in 2025A

Integration and optimisation of operations

#	Workstream	Key initiatives
1	Institutionalising the group	Group holding, board committees, delegation matrix, group policies, internal audit, monthly reporting pack, budget cycle, code of conduct
2	Human resources	Single grading and pay scale, nursing academy, e-learning platform, performance reviews, talent pipeline, staff clinic, engagement survey
3	Supply chain and synergies	Central purchasing, framework contracts with suppliers, consignment stock for implants, pharmacy formulary, inventory control, logistics hub
4	Infrastructure and technology	Single HMIS, PACS, laboratory information system, ERP, cybersecurity, biomedical maintenance contracts, energy retrofits, telemedicine
5	Quality	Group quality manual, accreditation programme, incident reporting, infection control, clinical audits, patient-experience office, protocols
6	Business development	Group payor contracts, corporate sales team, international patient desk, referral network, brand architecture, digital marketing, alliances
7	Capacity and patient flow	Bed management, theatre scheduling, discharge planning, day-case conversion, ER triage, cross-site referrals, demand forecasting

Integration indicators 2025A

$0.9M
Procurement savings vs 2022 baseline (6-8% on consumables and pharmacy)

210
Shared-services staff (finance, HR, IT, purchasing)

4,300
Cross-site patient referrals

69.7%
Group gross margin (2022A: 69.2%)

Synergy extraction resulting from scale and integration

- Scale efficiencies
  - Bargaining power with suppliers and equipment vendors
  - No duplication of back-office and support functions
  - Cross-site training and pooled specialist rosters
- Attractiveness for practitioners and payors
  - Career management across four hospitals
  - One contract, one tariff grid and one billing interface for payors
- Diversification of business model and risk
  - Balanced local and foreign patient base, three payor types
  - Reduced dependence on any one facility or specialty
- In-market cross patient referrals
  - Complex cases referred to the relevant Centre of Excellence
  - Higher utilisation of high-value equipment

Effect on the group

Standardised quality, enhanced margins, stronger partnerships, easier recruitment, established Centres of Excellence, shared cost benefits and improved billing and collection.

Source: Company information

An integrated hospital management information system with over one million patient records

A single HMIS across all sites since 2021 gives management a live view of activity, revenue and quality

Integrated HMIS since 2021

- Fourteen modules cover the full patient journey from registration to discharge summary, including the pathology, radiology and pharmacy systems, with one medical record number per patient across the four hospitals and AHG Diagnostics.
- Billing is generated at the point of care, which has held days sales outstanding at 66-67 days (65.7 in 2021, 67.4 in 2025) despite a rising share of insured and corporate patients, and cut billing disputes with insurers by about a third.
- The data warehouse feeds a management dashboard refreshed daily: occupancy, theatre utilisation, revenue per bed night, waiting times and clinical indicators by hospital and by doctor.

Patient health information data

1.2M Unique medical records	**2.4M** Radiology images archived (PACS)
4.8M Laboratory results	**3.1M** Electronic prescriptions

- Inpatient vitals and nursing observations captured electronically at the bedside.
- Pharmacy data linked to the formulary and to inventory, with automated reorder points.
- PACS data available to referring doctors through a secure portal.
- Laboratory data integrated with AHG Diagnostics for third-party clients.

The HMIS supports a live business-performance view and analytics, and the volume of structured clinical data is a foundation for the data-driven Centres of Excellence described in the strategy roadmap.

Source: Company information

AHG leads medical value tourism in the region, backed by a B2C, B2B and B2D marketing roadmap

42% of patients and 59% of revenues come from abroad; 38% of revenues are financed out of pocket

2025A patients by geography and revenues by payor

Domestic: Country A; Current MVT: 6 regional source markets; Potential MVT: 5 markets (feeder centres, not in plan)

Key comments

- Largest medical value tourism provider in the region, with an estimated 27% share of cross-border private hospital revenue; direct flights from all 6 current source markets.
- Three hospitals within 15 minutes of the airport and close to the hotel district; a dedicated international patient desk handles visas, transfers, interpreters and quotes within 48 hours.
- Procedures priced at 25-35% of private tariffs in high-income markets with comparable outcomes, internationally accredited quality and recognised doctors.
- Source markets: 6 regional source markets, served through 14 partner clinics and two airline partnerships; the neighbouring-country corridors, opened through corporate tenders and insurer onboarding in 2025, already represent about 10% of inpatient revenue and are the fastest-growing segment.
- Platform for regional expansion through feeder centres, acquisitions or operations-and-management contracts, as described in the strategy roadmap.

Marketing roadmap - targets for 2026

Objective	Key actions	Target 2026
Boosting online presence	Press relations programme, doctor interviews, patient stories	+40 media appearances
Social media optimisation	Editorial calendar per Centre of Excellence, paid campaigns in source markets	+25% engagement
Website	Multilingual site, online quotes, appointment booking, patient portal	+15% conversion
Scientific conferences	Speaker slots for AHG doctors, AHG-hosted symposia	12 conferences
International exhibitions	Presence at regional health and travel fairs; facilitator agreements	6 trade shows
B2B	Corporate health packages, insurer co-marketing, assistance-company protocols	20 commercial initiatives

Payor mix and geography per management analysis of 2025A billing data; out-of-pocket = patients without third-party coverage, incl. most international patients. Source: Company information

AHG has embraced an ESG strategy and delivers healthcare impact across the region

ESG action plan agreed with our DFI shareholders in 2022; annual sustainability report since 2023

Environment

- Energy: LED retrofits and solar panels at AHG Central and AHG North cut electricity consumption per bed night by 14% since 2022.
- Waste: segregated medical-waste streams with licensed contractors; 100% of hazardous waste traced.
- Eco-purchasing: supplier code of conduct and preference for reusable instruments where clinically appropriate.

Social

- Staff safety and anti-harassment policy with an independent whistle-blowing channel; zero tolerance enforced by the board.
- Internal communication: quarterly town halls and a staff app used by 85% of employees.
- Training: 31 hours per employee in 2025 through the nursing academy and e-learning platform.

Governance

- Compliance function reporting to the audit committee; anti-corruption and data-protection policies.
- Board with independent members and DFI observers; audit, remuneration and medical-quality committees.
- Transparency: audited group accounts, quarterly ESG reporting and annual risk assessments.

G2G and private-sector healthcare impact

Neighbouring source market 1	Neighbouring source market 2	Wider regional bloc
Pro-bono training of 60 nurses and technicians per year at AHG hospitals under a government-to-government agreement	Free check-up caravans reaching 5,000 people a year with local partner clinics	Telemedicine second-opinion service for two public hospitals; surgeons visit twice a year
Referral protocol for complex cardiology and oncology cases	Screening campaigns for breast and cervical cancer	Feeder-centre partnership under evaluation (see M&A page)

Example impact project - congenital heart screening

Since 2022 the group has screened 3,400 children from the region for congenital heart conditions under an outreach programme co-funded with a development finance institution (1); 184 subsidised procedures were performed at AHG North in 2025 alone. The programme trains local paediatricians in echocardiography and follows every child through the telemedicine service.

(1) Co-funded by a development finance institution and a private foundation; the balance is funded by the group. Source: Company information

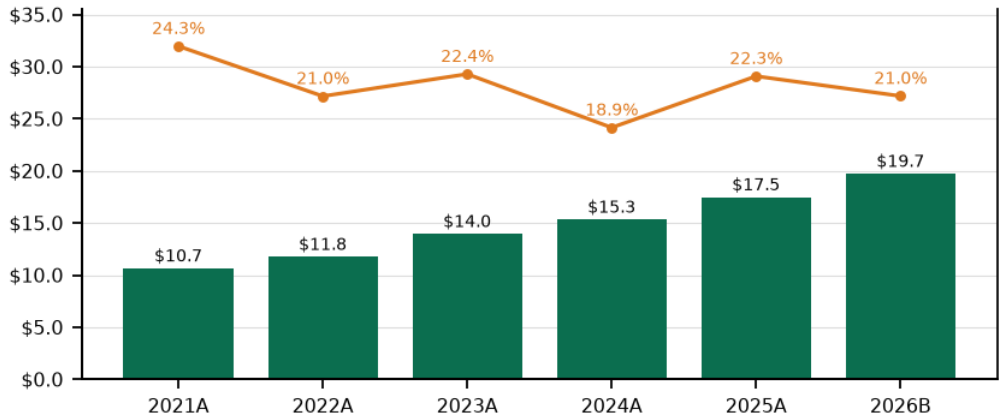

AHG Central - the flagship hospital and cardiac surgery Centre of Excellence

Founded in 2011 by Dr. Karim Sfaxi-Mellouli with 140 beds, AHG Central is the largest and best-known private hospital in Country A

Key performance indicators 2021A-2026B

KPI	2021A	2022A	2023A	2024A	2025A	2026B

Revenue (USD M) and EBITDA margin

- Centres of Excellence in cardiac surgery and interventional cardiology (two cath labs, structural heart programme in progress), neurosurgery and IVF and maternity; university teaching agreement; the group's main receiving site for international patients.
- Bed count increased from 168 to 176 in 2023 with the opening of a new surgical ward; occupancy has since run at 72-77%, the highest in the group.
- Hybrid operating theatre commissioned in 2024; a second-phase upgrade for the structural heart programme is planned for 2027.
- Contributes 32% of group revenue with the widest case mix; 2026 budget assumes continued price and volume growth in surgery and accommodation.

- Orthopaedics and trauma Centre of Excellence with the emergency department that receives the most visits in the group relative to its size (new department commissioned in 2022) and an advanced endoscopy suite; 120 beds after the 2023 extension.
- Occupancy of 66-71% leaves headroom for growth without additional beds; a ward renovation is planned for 2027.
- Cardiac catheterisation, IVF and radiotherapy are referred to AHG Central, AHG Park and AHG North rather than duplicated on site.
- A 40-bed orthopaedic and surgical wing is at feasibility stage and is not included in the 2026 budget.

(1) USD at 0.235 USD/LCA; revenues net of doctors' fees; 2025A preliminary, unaudited; 2026B = budget. Source: Company information; management accounts; 2026 budget

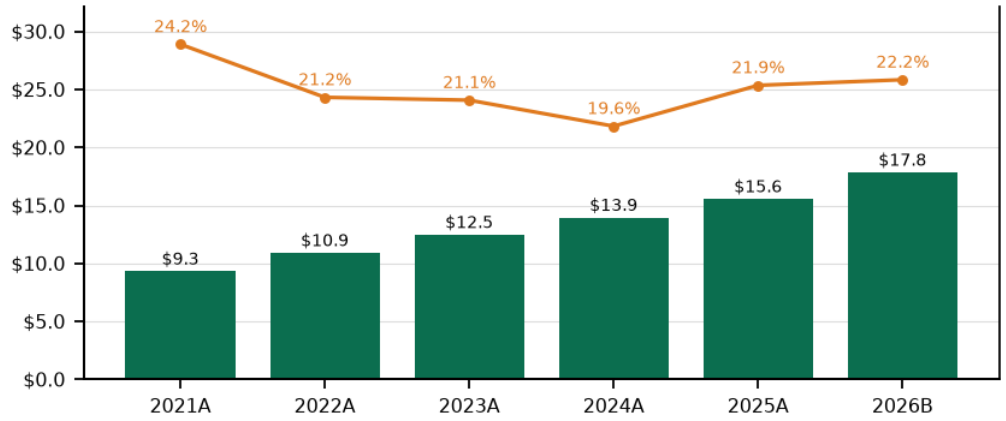

AHG North - oncology Centre of Excellence with the only private radiotherapy unit

Acquired in 2020 (90%) and expanded in a second oncology phase in 2023, AHG North combines a general hospital with a comprehensive cancer centre

Key performance indicators 2021A-2026B

Revenue (USD M) and EBITDA margin

- Radiotherapy unit delivered 6,588 sessions in 2025A, treating 27 patients per day on a single linear accelerator against a maximum of 36; the second machine in the capex programme doubles capacity.
- Chemotherapy day unit, weekly multidisciplinary tumour boards with our international academic advisor, and a nuclear-medicine partnership.
- Cath lab and interventional cardiology since 2021; bed count increased from 134 to 142 in 2023 with the second-phase oncology expansion; host site of the congenital-heart outreach programme (184 subsidised procedures in 2025).
- Radiotherapy alone contributed 13% of the hospital's revenue in 2025A and is the single most important driver of international oncology referrals.

(1) USD at 0.235 USD/LCA; revenues net of doctors' fees; 2025A preliminary, unaudited; 2026B = budget. Source: Company information; management accounts; 2026 budget

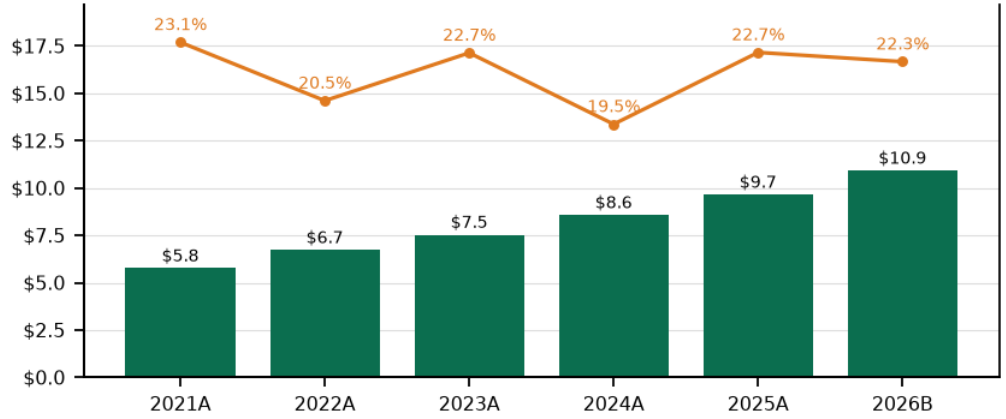

AHG Park - maternity, IVF and rehabilitation in the business district

Acquired in 2022 with Fund II's follow-on, AHG Park serves the business district and hosts the maternity & IVF and rehabilitation Centres of Excellence

Key performance indicators 2021A-2026B

KPI	2021A	2022A	2023A	2024A	2025A	2026B

Revenue (USD M) and EBITDA margin

- Maternity and IVF Centre of Excellence with a high-risk pregnancy unit, a rehabilitation centre (neuro- and cardiac rehabilitation) and an insurer preferred-provider network; 104 beds after the 2023 extension; site held on a 25-year lease to 2039.
- Occupancy of 61-65% reflects the young catchment area; a 24-bed ward is being commissioned in H1 2026 within the existing building, and a 40-bed extension with a second IVF laboratory on adjacent land held under option is planned from 2027 (decision in H2 2026).
- Endoscopy, cardiac catheterisation and neurosurgery are referred within the network; the hospital in turn receives maternity, IVF and rehabilitation referrals from the other three sites.
- Highest EBITDA margin among the hospitals in 2025A thanks to a lean cost base and the rehabilitation activity.

(1) USD at 0.235 USD/LCA; revenues net of doctors' fees; 2025A preliminary, unaudited; 2026B = budget. 2021A pro forma (AHG Park consolidated from its acquisition in 2022). Source: Company information; management accounts; 2026 budget

AHG Diagnostics - laboratory and imaging platform for the group and third-party clinics

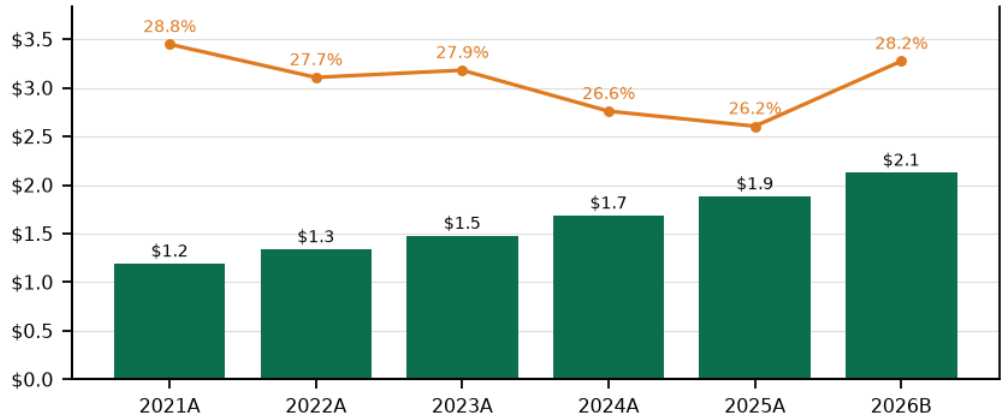

Revenue of LCA 8.0M in 2025A (+11.8%) at a 26.2% EBITDA margin; the fastest-growing entity in the group

Key performance indicators 2021A-2026B

KPI	2021A	2022A	2023A	2024A	2025A	2026B
Revenue (LCA M)	**5.1**	**5.7**	**6.3**	**7.2**	**8.0**	**9.1**
Growth	11.1%	12.3%	10.4%	14.0%	11.8%	12.9%
Revenue (USD M) (1)	1.19	1.34	1.48	1.69	1.89	2.13
EBITDA (USD M)	**0.34**	**0.37**	**0.41**	**0.45**	**0.49**	**0.60**
EBITDA margin	28.8%	27.7%	27.9%	26.6%	26.2%	28.2%
Laboratory tests (000s)	612	689	748	861	957	1,070
Imaging exams (000s)	38.1	42.6	46.9	53.4	59.7	66.8
Third-party clients (clinics, employers)	61	74	88	103	121	135

Laboratory tests, imaging exams and client counts are operational statistics of the entity; test volumes performed for the four hospitals are recorded in the hospital KPIs and billed intra-group.

Revenue (USD M) and EBITDA margin

- Built out from 2021 with Fund II's investment and carved out in 2022 as a standalone, internationally laboratory-accredited platform consolidating the group's laboratories and imaging, with a central reference laboratory, six collection points and a logistics hub.
- Serves 121 third-party clients, mainly private clinics, corporate health programmes and insurers' check-up packages, which now generate more than half of its revenue.
- Highest margin in the group given the automated core laboratory and the absence of hotel costs; 2026 budget targets 12.9% growth on new corporate contracts.
- Provides the data backbone for the screening programmes and the feeder-centre model in the regional bloc.

(1) USD at 0.235 USD/LCA; 2025A preliminary, unaudited; 2026B = budget. Source: Company information; management accounts; 2026 budget

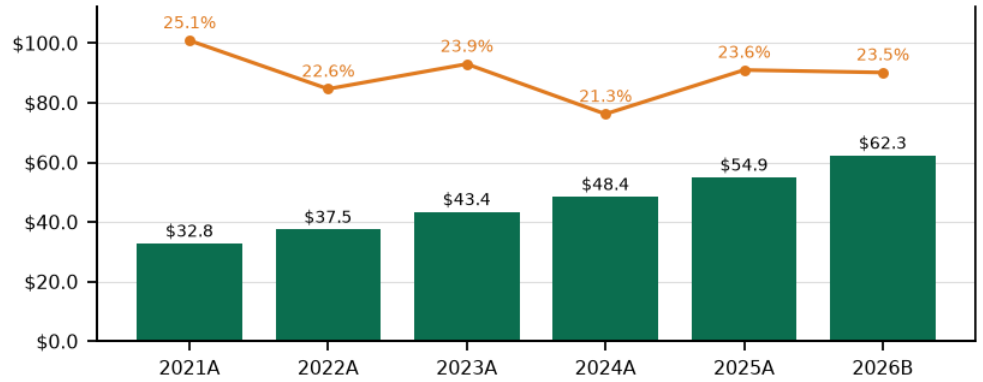

Group financials: revenue CAGR 13.8%, EBITDA CAGR 12.0% over 2021A-2025A, with deleveraging

2026 budget: revenue $62.3M (+13.4%), EBITDA $14.6M (23.5% margin), net debt down to 1.43x EBITDA

Revenue (USD M) and EBITDA margin

Outlook and 2026 budget

- Revenue growth of 13.4% in 2026B is driven by price increases of 5-7% across service lines, higher radiotherapy utilisation and a full year of new corporate contracts at AHG Diagnostics; no acquisitions are assumed.
- EBITDA margin of 23.5% after a $1.7M increase; payroll budgeted at 33% of revenue including the nursing pay-scale harmonisation.
- Capex of $3.9M and scheduled debt repayment of $3.1M are funded from operating cash flow; after a $1.6M dividend the budget is cash-neutral (free cash flow of -0.02M USD), and net debt falls to $20.9M.
- Medium-term ambition: double group EBITDA every five years through the six levers of the strategy roadmap, before any M&A upside.

(1) Management accounts (2025A preliminary, unaudited); 2026B = budget approved Jan. 2026; USD at 0.235 USD/LCA; AHG Park pro forma pre-2022. (2) Gross debt incl. overdrafts less cash. Source: Company information; management accounts; 2026 budget

Agenda

1	Overview of the Company	Page 3
2	**Strategy Roadmap**	**Page 22**
	Appendix - definitions, KPI reconciliation and basis of preparation	Page 26

The second part of the presentation sets out the strategic foundation of the group, the six organic growth levers of the 2026-2030 roadmap and the M&A upside available to the platform, before the appendix with definitions, the per-hospital KPI reconciliation and the basis of preparation.

Source: Company information

Strategic foundation: local-market Centres of Excellence and international patient growth

Financial ambition: double EBITDA every five years while keeping net leverage below 1.5x

Strategic foundation

Pillar	Statement
Vision	The leading integrated private healthcare provider in Country A and the reference platform for the region's international patients.
Financial ambition	Double group EBITDA every five years ($13.0M in 2025A) with organic growth and margin expansion, before M&A.
Where to play	Patient mix: a balanced base of domestic patients (58% of volumes) and international patients from 6 regional source markets. Specialties: seven Centres of Excellence with tertiary capability. Location: the capital metro area first, then selected secondary cities and the regional bloc.
How to win - local patients	Payer and corporate partnerships; first point of care through emergency and outpatient services; complexity of procedures that public hospitals cannot offer.
How to win - international patients	Accredited quality at 25-35% of high-income-market private tariffs; a dedicated international desk and facilitator network; Centres of Excellence marketed by specialty rather than by hospital.

Centres of Excellence by facility - consolidating care under one umbrella

AHG operates as a one-stop shop offering a full continuum of care: patients enter through any hospital and are treated in the Centre of Excellence best suited to their condition.

Facility	Centres of Excellence
AHG Central	Cardiac surgery and interventional cardiology, neurosurgery, IVF and maternity
AHG Coast	Orthopaedics and trauma, emergency and endoscopy
AHG North	Oncology and radiotherapy; cardiac cath lab
AHG Park	Maternity and IVF, physiotherapy and rehabilitation

AHG network

Cardiac surgery	Oncology	Neurosurgery	Ortho & trauma	IVF & maternity	Emergency & endoscopy	Physio / rehab

Delivery against the foundation since 2021

- Revenue grew from $32.8M to $54.9M and EBITDA from $8.2M to $13.0M between 2021A and 2025A (pro forma for AHG Park, acquired in 2022), with no further acquisitions since.
- Net leverage reduced from 3.40x to 1.85x EBITDA while investing $14.0M of capex, including 32 additional beds in 2023, the second-phase oncology expansion at AHG North and the hybrid theatre.
- International patients rose to 42% of volumes; radiotherapy sessions at AHG North reached 6,588 in 2025A; a 24-bed ward at AHG Park is being commissioned in H1 2026.

Source: Company information

A clear growth roadmap to consolidate our leading platform position: six organic levers

Six levers, each owned by a member of the executive committee and tracked monthly in the group dashboard

Lever 1	Lever 2	Lever 3	Lever 4	Lever 5	Lever 6
Integrating the platform	Enhancing utilisation and optimising capacity	Expanding capacities and the feeder network	Increasing the complexity of procedures	Leveraging our position with insurers and corporates	Growing Centres of Excellence and leveraging big data

1. Integrating the platform	2. Enhancing utilisation and optimising capacity	3. Expanding capacities and the feeder network	4. Increasing the complexity of procedures	5. Leveraging our position with insurers and corporates	6. Growing Centres of Excellence and leveraging big data
Complete the shared-services model: one finance, HR, procurement and IT organisation for all sites	Lift bed-weighted occupancy from 70.3% to 75.7% by 2030 through theatre scheduling and discharge management	Park and Coast extensions (up to 80 beds) subject to board decision	Structural heart (transcatheter valves), robotic urology, complex spine and stereotactic radiotherapy programmes	Multi-location corporate contracts with bundled pricing for the largest insurers and employers	Analytics on 1.2M unique medical records for length-of-stay and outcome benchmarking
Harmonise clinical protocols and tariffs across the four hospitals	Convert 20% of elective surgery to day cases	Acquire established hospitals in secondary cities (add-on programme)	Oncology day-care expansion at AHG North with the second linear accelerator (2027)	Direct billing agreements with two further regional insurers	Grow the oncology, cardiac and orthopaedic Centres of Excellence with dedicated coordinators
Extend the HMIS to AHG Diagnostics' third-party clients	Renovation of AHG Coast wards (2027); tele-consultation for follow-ups	Open feeder centres in two of the neighbouring source markets	Second IVF laboratory at AHG Park	Tariff indexation clauses in all renewals	Launch two further centres (bariatric and spine) by 2028
	Second radiotherapy machine to remove the current capacity ceiling	Border ambulatory centre for pre- and post-operative care	Revenue per admission targeted to grow 6-8% a year	Corporate health packages sold through AHG Diagnostics	

Targets underpinning the roadmap (2026-2030)

75.7% Bed-weighted occupancy by 2030 (from 70.3%)	**20%** Elective surgery as day cases	**72 / day** Radiotherapy patients per day (from 36)	**+6-8% p.a.** Revenue per admission	**2** New Centres of Excellence by 2028	**2x** EBITDA every five years

Expected contribution

Levers 1 and 2 support margin; levers 3 to 6 support volume and price. Together they underpin the ambition of doubling group EBITDA every five years before any M&A upside, while net leverage stays below 1.5x EBITDA.

Source: Company information

Additional upside: AHG is the natural platform for consolidation through M&A

Domestic and regional add-ons are upside to the budget; none is included in the 2026 figures or the bed counts shown

1. Domestic

- Add bed capacity in the medium term
  - Two established hospitals of 80-120 beds each in secondary cities; five target cities identified, two targets in advanced discussions at 5.0-5.5x EBITDA
  - Targets complement existing specialties (maternity, orthopaedics) and become referral sources for oncology and cardiac cases
- Extend the metro-area footprint
  - Park and Coast extensions (up to 80 beds) and the fragmented local market: six single-site operators with 118-310 beds each and no group structure
  - Integration playbook proven on three acquisitions

2. Regional bloc

- a. Acquire another existing platform
  - Pros: immediate scale, local licences and accretive MVT referrals; cons: valuation, governance and currency risk
  - One 70-bed target under review at 6.0-6.5x EBITDA
- b. Acquire selected feeder centres
  - Outpatient and diagnostic centres in source markets that refer complex cases to AHG and treat simpler cases locally; feeder centres in two source markets modelled from 2028
  - Win-win: local access to specialists and a defined care pathway, AHG access to patients
  - Lower capital intensity; operations-and-management contracts as an alternative

Add-on pipeline (illustrative, anonymised)

Target	Type	Location	Beds	Status
Target A	General private hospital (maternity, orthopaedics)	Secondary city 1	96	Advanced discussions
Target B	General private hospital	Secondary city 2	112	Advanced discussions
Target C	Feeder centre (outpatient)	Neighbouring source market 1	-	Term sheet
Target D	Feeder centre (dialysis and imaging)	Neighbouring source market 2	-	Screening
Target E	Regional hospital platform	Regional source market	70	Under review
Target F	Diagnostic and outpatient centre	Secondary city 3	-	Screening

Financial framework

Add-ons are evaluated at 5.0-6.5x EBITDA with a minimum 20% return on invested capital after synergies, funded from operating cash flow, follow-on equity from shareholders and local debt, keeping net leverage below 2.0x EBITDA at all times.

Source: Company information

Appendix - definitions, KPI reconciliation and basis of preparation

Definitions

Term	Definition
Revenue	Hospital and diagnostics revenue net of doctors' fees invoiced directly by partner doctors; consolidated after intercompany elimination
EBITDA	Gross margin less payroll and operating expenses, before provisions, depreciation, amortisation and goodwill / PPA amortisation
EBIT	EBITDA less provisions, depreciation and amortisation and goodwill / PPA amortisation
Net debt	Medium-term loans plus short-term financial liabilities and overdrafts, less cash and cash equivalents
Occupancy	Occupied bed nights divided by available bed nights (inpatient beds x 360 days)
Inpatient admissions	Occupied bed nights divided by facility average length of stay (3.4-3.9 days)
USD equivalents	Local currency (LCA) converted at 0.235 USD/LCA for all years (the transaction-model reference rate)
2025A / 2026B	2025 preliminary unaudited management accounts; 2026 budget approved by the board in January 2026

KPI reconciliation - 2025A

KPI	Central	Coast	North	Park	Group
Inpatient beds	176	120	142	104	542
Available bed nights	63,360	43,200	51,120	37,440	195,120
Occupied bed nights	47,982	28,489	36,921	23,763	137,155
Occupancy	75.7%	66.0%	72.2%	63.5%	70.3%
Surgeries incl. cath lab	5,938	3,875	4,626	3,216	17,655
Laboratory tests	136,349	111,021	116,434	90,213	454,017
Radiology exams	36,270	24,489	28,657	23,467	112,883
Revenue (USD M)	17.5	11.4	15.6	9.7	54.1
EBITDA (USD M)	3.9	2.4	3.4	2.2	11.9

Group revenue of $54.9M = four hospitals $54.1M + AHG Diagnostics $1.89M less intercompany elimination $1.03M. Group EBITDA of $13.0M includes AHG Diagnostics and the holding company net of intercompany items.
